

Physician's Permanent Medical Exemption Based On Contraindications To Vaccinations

PATIENT NAME	ADDRESS
DATE OF BIRTH	HOME TEL
SEX	Passport / ID#

TO WHOM IT MAY CONCERN:

IMPORTANT: the physical condition of said patient / name above is such that the following vaccines / immunizations would endanger this person's health due to severe or life-threatening contraindications:

<input checked="" type="checkbox"/> Acel-Immune DTaP (Daptacel or Tripedia), DPT or Infanrix (diphtheria tetanus pertussis)	<input checked="" type="checkbox"/> DTaP-Hep B- IPV or Pediarix or TriHIBit	<input checked="" type="checkbox"/> BioThrax (anthrax)	<input checked="" type="checkbox"/> Act HIB or HiB Titer or HiB / Pedvax HIB (Haemophilus influenza such as H5N1)	<input checked="" type="checkbox"/> H1N1, A/H1N1 Daronix, or other HxNx (Swine / Avian Flu or combo, where 'x' is a number sequence)	<input checked="" type="checkbox"/> Fluvirin, Fluzone, Fluarix, FluMist, FluLaval, FluShield or other influenza
<input checked="" type="checkbox"/> MMR / MMR-II, Mumpsvax, Meruvax-II or M- R-Vax or Meruvax-I (measles mumps rubella)	<input checked="" type="checkbox"/> MMRV / ProQuad (measles, mumps, rubella and varicella)	<input checked="" type="checkbox"/> Havrix (hepatitis A)	<input checked="" type="checkbox"/> Engerix-B or Recombivax- HB (hepatitis B)	<input checked="" type="checkbox"/> Hepatitis A- Hepatitis B (Twinrix)	<input checked="" type="checkbox"/> Hib- Hepatitis B (Comvax)
<input checked="" type="checkbox"/> Tdap (Boostrix / Adacel) or Td (Decavac / Aventis Pasteur, Sanofi Pasteur) (tetanus)	<input checked="" type="checkbox"/> YF-VAX (yellow fever)	<input checked="" type="checkbox"/> Havrix or Vaqta (hepatitis A)	<input checked="" type="checkbox"/> Human papillomavirus (HPV) / Gardasil	<input checked="" type="checkbox"/> Pneumovax (Streptococcus pneumoniae)	<input checked="" type="checkbox"/> JE-VAX (Japanese encephalitis)
<input checked="" type="checkbox"/> Menomune or Menactra (meningococcal)	<input checked="" type="checkbox"/> Zostavax (shingles)	<input checked="" type="checkbox"/> Attenuvax (Measles)	<input checked="" type="checkbox"/> Biavax (rubella)	<input checked="" type="checkbox"/> Imovax or RabAvert or BioRab (rabies)	<input checked="" type="checkbox"/> TOPV (Trivalent oral polio); IPOL or Poliovax or Orimune; EIPV (enhanced / inactivated polio)
<input checked="" type="checkbox"/> Prevnar or Pneumovax-23 (Pneumococcal)	<input checked="" type="checkbox"/> DT (Sanofi Pasteur)	<input checked="" type="checkbox"/> Dryvax or NYVAC or live vaccinia virus (smallpox)	<input checked="" type="checkbox"/> Tripedia (diphtheria tetanus and pertussis)	<input checked="" type="checkbox"/> Varivax (chickenpox)	<input checked="" type="checkbox"/> Typhim Vi or Vivotif (typhoid / typhoid inactivated / typhoid oral)
<input checked="" type="checkbox"/> TheraCys BCG (Tice) (tuberculosis)	<input checked="" type="checkbox"/> RotaShield or RotaTeq or Rotarix (rotavirus)	<input checked="" type="checkbox"/> LYMERix (Lyme)			

Physician's Permanent Medical Exemption Based On Contraindications To Vaccinations

PATIENT NAME	ADDRESS
DATE OF BIRTH	HOME TEL
SEX	Passport / ID#

Specific Nature of Medical Condition Of Patient / Name Listed Above:

- **Serious allergic reactions (e.g., anaphylaxis) to many vaccine components.**
- **Present and potential severe or life-threatening contraindications to the vaccinations / immunizations (as listed above):**
 - hypotonic-hypo-responsive episodes, progressive neurologic disorders, Guillain-Barré syndrome and other types of auto-immune disease including fibromyalgia, macrophage myofascitis, auto-immunity vaccine-related encephalitis, prolonged seizures, life-threatening hyper-immune responses, substantial suppression of cellular immunity, and cardiac arrest.
- **The patient / name listed above is **MEDICALLY INTOLERANT** to formaldehyde.**
- **The patient / name listed above is **MEDICALLY INTOLERANT** to aluminum.**
- **The patient / name listed above is **MEDICALLY INTOLERANT** to mercury.**
- **The patient / name listed above is **MEDICALLY INTOLERANT** to egg protein.**

Excipients Found / Manufactured In The Vaccines (As Listed Above) That Would Cause Serious Or Life-Threatening Contraindications, Allergenic Hyper-Immune Responses, And/Or Reactions To Patient / Name Listed Above:

- **Animal By-Products**
 - Chicken embryonic fluid / chick embryo fibroblast tissue culture, chick kidney cells, ovalbumin (egg albumin), egg / chicken protein, human diploid cells from aborted fetal tissue, washed sheep RBCs, calf skin vesicle fluid, MRC-5 cellular protein, monkey (Vervet or African Green) kidney cells, Rhesus monkey fetal lung / diploid cells, mouse serum protein, mouse brain culture, bovine albumin / gelatin, Linggoud--Fenton / Lathan media containing bovine casein / extract, bovine calf (fetal) serum / protein, guinea pig embryo cells, Medium 199.
- **Growth Mediums & Manufacturing Residues**
 - Human serum albumin (and/or albumin from human blood / human diploid cells or WI-38 from aborted fetal tissue), bacto-peptone, Dulbecco's Modified Eagle Medium (DMEM), hydrocortisone, Tocopheryl hydrogen succinate, yeast protein (especially *Saccharomyces cerevisiae* and GMO yeast), Mueller-Hinton agar, Puziss-Wright medium 1095, Stainer-Scholte medium, soy peptone broth, Watson-Scherp medium, phosphate-buffered saline.
- **Adjuvants / Chemicals / Mutagens / Heavy Metals**
 - MF-59 (Squalene), SV-40 mutagen, aluminum hydroxide, aluminum hydroxyphosphate sulfate, aluminum potassium sulfate, AS-03 adjuvant, aluminum phosphate, ammonium sulfate, aspartame.
- **Antibacterials / Antibiotics**
 - Amphotericin B, chlortetracycline, gentamicin sulphate, neomycin sulfate, polymyxin B sulfate, streptomycin sulfate, kanamycin.
- **Viral Inactivators**
 - Beta-propiolactone.

Physician's Permanent Medical Exemption Based On Contraindications To Vaccinations

PATIENT NAME	ADDRESS

- **Preservatives**
 - Thimerosal (mercury), benzethonium chloride, ethylenediamine-tetraacetic acid sodium (EDTA), phenol, 2-phenoxyethanol.
- **Dyes**
 - Brilliant green, phenol red (phenolsulfonphthalein) indicator.
- **Medium Nutrients**
 - Dextran, cystine, calcium chloride, ferric (III) nitrate, glutamine, magnesium sulfate, sodium hydrogenocarbonate, sodium phosphate, disodium phosphate, sodium pyruvate, magnesium chloride.
- **Toxin Inactivators / Detoxifiers**
 - Formaldehyde, formalin, glutaraldehyde.
- **Stabilizers**
 - Sorbitol, histidine, lactose, monosodium glutamate, potassium glutamate, urea.
- **pH Adjustors / Indicators & Tonicity Adjustors**
 - Hydrochloric acid, disodium, monosodium, sodium dihydrogen phosphate, potassium dihydrogen phosphate, potassium chloride, sodium acetate, sodium bicarbonate, sodium borate, sodium chloride, sodium citrate, sodium hydroxide, potassium monophosphate.
- **Microbes**
 - Polyribosylribitol phosphate, spirochete *Borrelia burgdorferi* recombinant protein (OspA), polysaccharide antigens from *Neisseria meningitidis* bacteria, vaccinia virus, capsular polysaccharides from polyvalent pneumococcal bacteria, fixed-virus / live virus strains.
- **Lubricants**
 - Magnesium stearate.
- **Antifoaming Agents**
 - Polydimethylsiloxane.
- **Surfactants**
 - Polysorbate 80 (Tween-80), polysorbate 20, polyoxyethylene9-10 nonylphenol (Triton N-101, octoxynol 9), polyoxyethylated octyl phenol (ethylene glycol octyl phenyl ether), octoxynol-10, octylphenoxypolyethoxyethanol, p-isooctylphenyl ether, Triton X-100, sodium deoxycholate.

Name of Physician

- Dr. _____, M.D.

Signature of Physician
